

# Erosion & Sedimentation Control

## **AVOID Fines & Project Interruptions.**

Stabilize your site to keep pollutants from reaching water.

This invites an inspection!

**Entrance**

**AVOID this kind of OFF-SITE TRACKING!!!**  
**MAINTAIN ENTRANCES to capture sediment on-site.**

Use the proper tools and techniques for your site.  
(silt fencing, gutter buddies, temporary berms)

**Inlet Protection**

**STORMDRAIN INLET PROTECTION is critical.**  
**Keep sediment and other pollutants out of waterways!**

Regularly check your site for changes & problem areas.  
Maintain erosion controls & modify them if they fail.

**Maintenance**

**This site REQUIRES MAINTENANCE!!!**  
**Conduct required weekly inspections & after 1/2" rains.**

**PROTECT local water.** For questions or concerns, call (352) 264-6800.
