Engineering and Operations Division

Project No. 6340 - SW 91st St at SW 8th Ave Intersection Modification

Design Details

Design Engineers- ACPW staff
Budget—\$500,000

Project Schedule

TBD

Project Description

- **Reconstruction of All-way stop controlled intersection to either signal or roundabout.**

Design Team

Design: TBD

PM: Chris Zeigler, ACPW

Project Progress

- **Utilities:** Utility Coordination will be required.
- **Drainage:** Drainage improvements are expected with any intersection modification.
- **Public Involvement:**
 - Staff presented an informational item to the BoCC on 7/12/11.
 - A public meeting is scheduled for August 18, 2011 at 6:00pm at the Tower Road library.
- **Design:**
 - ACPW staff completed a detailed traffic study of the intersection.
 - There are several options for improving the capacity of the intersection. These include a signal with left turn lanes on all approaches and a roundabout with a right turn slip lane on the northbound approach.
- **Right-of-way :**
 - Sufficient right-of-way exists for the signal and turn lanes.
 - A roundabout will require additional right-of-way.

On November 8, 2011, the Board of County Commissioners voted to defer this project until such time as it is necessary. This is the last update for this project.
