-------------	----------------	-------------	-----------	---------------	--	-------------------------------	--	----------------------

***Project scopes include constructing and/or reconstructing all transportation features to restore the functional life including adding sidewalks/paths , safety modifications, operational modifications and any other aspects required by law. Projects may include addition of travel lanes if funded by an alternate funding source and the changes are consistent with the Capital Improvements Element.**

****Estimated length need was calculated in 2013 based on urbanized areas; actual project length and sidewalk or multi-use path construction shall be determined during project development.**

*****Conceptual estimate using 2013 costs based on FDOT Long Range Estimates and Alachua County historical costs. Funds allocated to each project will be based on the actual need at the time of the project.**
